SUPP. TO  
REPORT NO.

- At the beginning of Nov 53 the SAG Bleichert began work on an order for the manufacture of 80 four-wheeled rail cars for the Soviet Union. These cars are about 2.3 meters long with a wheel diameter of 40 to 50 cm. According to one of the engineers, these cars are designed for under-carriages for rockets.
- The electric car department is building rubber tired cars with a load capacity of two tons, equipped with a hydraulic lifting mechanism. The wheels are about 40 cm in size. These cars allegedly are to be used for transporting bombs at airfields.

- end -
